WTIA AS 1796 Certificate 10 and AS 2214 Welding Supervisor Examinations

WTIA special offer on examination fees for Welding Supervisors AS 1796 Certificate 10 and AS 2214

WTIA has been receiving increasing communications from people in industry who are becoming concerned about their jobs or facing the problems of unemployment.

In these difficult circumstances, WTIA is offering genuinely unemployed people the opportunity to write WTIA Welding Supervisor examinations free-of-charge and WTIA members and non-members to write the examinations at significantly reduced examination fees.

This will assist people who do not already have WTIA Welding Supervisor qualification recognition, but do meet the necessary criteria, to sit the examinations and will optimise both their opportunity to apply for and obtain jobs on a national basis as well as their career development.

The examination application form should be received with the appropriate documentation at **WTIA, PO Box 6165, Silverwater, NSW 1811, by 11th May 2010 and 12th October 2010** which is four weeks before the examination date of 11 June 2010 and 12th November 2010 respectively.

Locations for the examinations around the country will depend on the number of applications received from each location. Successful applicants will be advised of the venue two weeks prior to each examination.

You can also obtain the application form from the website: www.wtia.com.au under "Downloadable Documents – Qualification and Certification Documents" or contact Federal Office on telephone 02 9748 4443 or fax 02 9748 2858, or email: a.cantero@wtia.com.au

*"WTIA National Skills Campaign"
Targeting Skills Needs in all Regions to Keep Jobs in Australia*

The WTIA has joined forces with industry and Governments and created a multi million dollar Technology Support Centres Network. This Network assists industry to identify and exploit world's best technology and manufacturing methods to establish a vibrant Australian industry beyond 2020. Together we are implementing a step-by-step process that will lead to ongoing viability and greater profitability for all concerned:

- (1) Determine your technological and manufacturing needs;
- (2) Identify world's best practice;
- (3) Draw upon the Network to implement world's best practice at your site.
